

Muhammad Maaz Bin Imtiaz

SQA Engineer

maazimtia3456@gmail.com • 03313654593 • Karachi, Pakistan • LinkedIn • GitHub

PROFILE

With 1.5 years of experience, I focus on making software reliable, fast, and user-friendly. I enjoy exploring complex systems to identify performance gaps and ensure a seamless experience. Currently, I'm balancing professional work with a Master's degree to stay ahead of industry trends.

SKILLS

- Software Testing
 - Functional Testing
 - Playwright (JavaScript, C#)
 - API Testing Using Postman / Swagger
- Manual / Automation Testing
 - Selenium (C#)
 - Bug Reporting
 - K6

PROFESSIONAL EXPERIENCE

- Geeks of Kolachi, SQA Engineer**

08/2025 – Present | Karachi, Pakistan

 - Achieved 95%+ coverage through functional and regression testing of web, mobile, and API modules.
 - Wrote clear, reusable test cases to simplify complex scenarios for the team.
 - Tracked and documented defects using Jira and Trello to ensure quality.
 - Reduced production bugs by 20% by fixing gaps in regression tests and catching recurring issues early.
 - Collaborated closely with Developers and Project Managers to align QA activities with project goals and deadlines.
 - Delivered technical demos to clients to showcase progress, gather feedback, and ensure transparency.
 - Conducted load and stress testing using K6 (JavaScript) to identify bottlenecks and ensure system stability.
- Tafsol Technologies (Private) Limited, Associate SQA Engineer**

03/2025 – 08/2025 | Karachi, Pakistan

 - Collaborate with PMs and Developers to gather requirements and confirm bug resolutions, ensuring timely delivery.
 - Design and execute Test Plans; performed Manual, Regression, and Automation Testing covering 95%+ features.
 - Conduct UI/UX reviews and tested Chat modules, Payment gateways, and AI Chatbots, including NSFW scenarios, to ensure secure interactions.
 - Performed API Testing using Postman and managed comprehensive bug reporting, contributing to 20% reduction in post-release bugs.
- SQA Intern**

09/2024 – 03/2025 | Karachi, Pakistan

 - Assisted PMs and Developers to define requirements and resolve bugs, supporting project alignment.
 - Executed Test Plans and Test Cases; performed Manual, Regression, and API Testing (Postman) to ensure software functionality.
 - Reviewed UI/UX designs and tested Chat modules and Payment gateways for secure, seamless interactions.
 - Practiced Automation Testing using Playwright to improve web application reliability and performance.

EDUCATION

- MS Software Engineering, National University of Computer and Emerging Sciences**

08/2025 – Present | Karachi, Pakistan
- BS Computer Science, Mohammad Ali Jinnah University**

08/2020 – 07/2024 | Karachi, Pakistan
- Pre-Engineering, Army Public School Faisal**

08/2018 – 07/2020 | Karachi, Pakistan

PROJECTS

- Papel Solutions**

11/2025 – 03/2026

 - Tested multiple deployment scripts for Windows, Mac, and Linux, including deployment, project setup (SQL & MinIO configuration), project updates (Docker container refresh), service startup, and uninstallation.
 - Monitored Docker container logs and reported issues to ensure stable system setup and smooth operation.
 - Verified complex RBAC roles (Super Admin, Tenant, Employee) to ensure secure access and proper data isolation.
 - Performed backend data validation using terminal-based SQL queries and Beekeeper to ensure database integrity.
 - Tested core functional modules for digital and physical document tracking (Retrievals & Access) and custom reporting.
 - Validated tenant-specific settings, including custom themes, password policies, and subscription features.
- Lynco – Business & Marketing Platform**

 - Tested onboarding for Business Owners: signup, subscription, and WhatsApp Business connection.
 - Verified bot activation and service setup, allowing users to book, reschedule, and manage appointments.
 - Tested the bot for different use cases, ensuring it worked correctly within its intended context.
 - Checked role-based access: Business Owners (full control) and Staff (all except payments).
 - Validated payment workflows using Pagar.me and ensured booked appointments synced correctly with Google Calendar.
 - Tested WhatsApp number change, Meta WebView login, and business page selection for proper bot assignment.
 - Verified Marketing module: template creation, Meta approval, campaign execution, and sending messages to end users with filters.
 - Designed and executed test cases to ensure features worked correctly and user experience was smooth.

CERTIFICATES

- QA Fundamentals
 - Introduction to API Testing with Postman
 - API Testing and Basic Overview of JMeter
 - Scrum Foundation Professional Certification
